

*"I was fortunate enough to acquire one of your Kwik Klip magazine conversion kits and I was very pleased with the results. I do not get the jam-ups like I did when my rifle was a top loader."*

*Langley, B.C. Canada*

*"My compliments to you for producing such a great and needed device as the Kwik Klip 'center-bore feed design'. I would like you to produce these excellent after market accessories for every rifle for which this is feasible."*

*Seattle, Washington*

**"They Approve"**

*"We have been using your Kwik Klip in four of our Remington BDL Rifles for several years and have been very satisfied with their performance."*

*Claypool, Arizona*

*"I showed your Kwik Klip conversion to one of my buddies. He is a master machinist who knows quality when he sees it, and was very impressed with the quality of your product."*

*Fairfield, Ohio*

# A KWIK KLIP Conversion

the most important accessory for your bolt action rifle

- Kwik Klip *eliminates jams* caused by excitement when reloading.
- Kwik Klip is *easy to load* with gloved or cold hands.
- Extra magazines provide *instant firepower* when needed. No need to carry loose rounds in your pocket or bulky cartridge belt.
- Kwik Klip looks like it's part of the rifle. *No unsightly protrusions* or sharp edges.
- *Eliminates working live rounds* through action when unloading rifle.

- Kwik Klip's detachable steel box magazine *snaps instantly and securely into place.*

- ⊕ Maintains classic appearance
- ⊕ Superb fit and finish
- ⊕ Convenience
- ⊕ Easy to install
- ⊕ Patented one-touch operation
- ⊕ Jamproof center-bore feeding
- ⊕ Provides added safety when loading and unloading
- ⊕ Makes magazine loading a quick and easy process

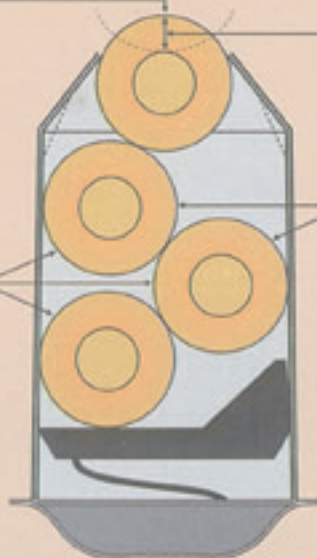

Kwik Klip 700 installs in minutes in a 700 BDL, 700 Classic or 725 Remington Rifle. Installation in a 700 ADL or 721, does require additional inletting. Kwik Klip 700 works in right or left hand actions and standard or heavy barrel models.

***Kwik Klip Conversions bring loading and unloading methods out of the 1800's with the Reliability and safety of the 1990's.***

Center-bore feeding is 100% reliable. Insures no jams or bullet damage which can occur in conventional feeding

Two column cartridge arrangement inside clip assures the same round capacity as before.

Kwik Klip magazines are loaded from the front. Clips hold four rounds. (Three in magnum.)

Three times the normal bolt-to-cartridge engagement ensures smoother, positive feeding.

Though staggered in the clip, each cartridge automatically centers itself after the fired round is ejected.

Ten-round magazine (8 in magnum) also feature center-bore feeding.

The Kwik Klip system is much safer to use than conventional methods. Kwik Klip 700 also makes feeding smoother and completely reliable with our center-bore feeding design.
